

Review of corrosion studies on aluminium metal matrix composites	27
A. Turnbull	27
Hydrodynamic removal of corrosion products from a surface	36
E. F. C. Somerscales and H. Sanatgar	36
Technical note Localised corrosion of electric resistance welds of austenitic stainless steel in sea water	45
H. M. Shalaby and A. Husain	45
Stress corrosion cracking behaviour of 2091 Al-Li alloy in sulphate and chloride containing solutions	50
S. Marsac, G. Mankowski, and F. Dabosi	50
Performance of AISI 304L stainless steel with exposed end grain in intergranular corrosion tests	59
V. Kain, S. S. Chouthai, and H. S. Gadiyar	59
Case history Corrosion of equipment in steam circuit of fertiliser plant	66
K. M. Verma, H. Ghosh, S. C. Verma, A. K. Sinha, and K. C. Pattnaik	66
Studies on magnesium and its alloys in battery electrolytes	68
R. Udhayan, N. Muniyandi, and P. B. Mathur	68
Characterisation of passive films on copper	72
S. Sathiyanarayanan, Sp. Manoharan, G. Rajagopal, and K. Balakrishnan	72
Corrosion inhibition of OFHC copper by prefilming with organic compounds	75
G. Brunoro, F. Parmigiani, G. Perboni, G. Rocchini, and G. Trabanelli	75
Cavallaro Medal address High temperature oxidation and sulphidation and their prevention by ceramic coatings	105
P. J. Gellings	105
Electrochemical characteristics of reinforced concrete corrosion as determined by impedance spectroscopy	113
K. K. Sagoe-Crentsil, F. P. Glasser, and J. T. S. Irvine	113
Technical note Determination of ohmic voltage drop in electrochemical polarisation measurements in thin phase layers of electrolytes	119
A. R. Basman and L. I. Freiman	119
Passivation of stainless steels in thin phase layers and in bulk of acid sulphate solutions	121
A. R. Basman, S. B. Adelaju, and L. I. Freiman	121
Application of a new computational method to determine corrosion current density in a cathodically protected system	125
I. Qamar and S. W. Husain	125
Oxidising type inhibitors for protection of aluminium and steel surfaces in sodium chloride solutions	128
A. Kh. Bairamov and S. Ch. Verdiev	128
Galvanic coupling of 316L steel with titanium, niobium, and tantalum in Ringer's solution	135
J. Gluszek and J. Masalski	135
Dibutyl thiourea as corrosion inhibitor for acid washing of multistage flash distillation plant	139
T. M. H. Saber, A. M. K. Tag El Din, and A. M. Shams El Din	139
Influence of tin addition on corrosion resistance of aluminium ion platings	144
O. A. Abu Zeid	144
Chemical passivation of ferrous materials in presence of salts of phosphonic acids	147
A. Veres, G. Rheinhard, and E. Kálmán	147
Corrosion of copper alloys by gaseous uranium hexafluoride	151
S. W. Vorster and F. P. A. Robinson	151
Development of a new fastener alloy resistant to hydrogen embrittlement	157
C. A. Clark, S. Driscoll, and P. Guha	157
EFC Medal address Flow induced corrosion: 25 years of industrial research	193
J. Weber	193
Chelant enhanced passivation of carbon steel in deoxygenated alkaline aqueous solutions	200
P. S. Joshi, G. Venkateswaran, and K. S. Venkateswarlu	200
Zinc and polyphosphates as corrosion inhibitors for zinc in near neutral waters	207
C. M. Rangel, J. de Damborenea, A. I. de Sá, and M. H. Simplicio	207
Corrosion inhibition of carbon and low alloy steels in hot hydrochloric acid solutions	213
G. Trabanelli, F. Zucchi, G. Brunoro, and G. Rocchini	213
Influence of σ phase on general and pitting corrosion resistance of SAF 2205 duplex stainless steel	219
J. H. Potgieter	219
Discussion	319
Effect of cooling rate on corrosion properties of 3CR12 type alloys	224
A. van Bennekom and F. P. A. Robinson	224

Review of corrosion studies on aluminium metal matrix composites	27
A. Turnbull	27
Hydrodynamic removal of corrosion products from a surface	36

Galvanic coupling of 316L steel with titanium, niobium, and tantalum in Ringer's solution	135
J. Gluszek and J. Masalski	135
Dibutyl thiourea as corrosion inhibitor for acid washing of multistage flash distillation plant	139
T. M. H. Saber, A. M. K. Tag El Din, and A. M. Shams El Din	139
Influence of tin addition on corrosion resistance of aluminium ion platings	144
O. A. Abu Zeid	144
Chemical passivation of ferrous materials in presence of salts of phosphonic acids	147
A. Veres, G. Rheinhard, and E. Kálmán	147
Corrosion of copper alloys by gaseous uranium hexafluoride	151
S. W. Vorster and F. P. A. Robinson	151
Development of a new fastener alloy resistant to hydrogen embrittlement	157
C. A. Clark, S. Driscoll, and P. Guha	157
EFC Medal address Flow induced corrosion: 25 years of industrial research	193
J. Weber	193
Chelant enhanced passivation of carbon steel in deoxygenated alkaline aqueous solutions	200
P. S. Joshi, G. Venkateswaran, and K. S. Venkateswarlu	200
Zinc and polyphosphates as corrosion inhibitors for zinc in near neutral waters	207
C. M. Rangel, J. de Damborenea, A. I. de Sá, and M. H. Simplicio	207
Corrosion inhibition of carbon and low alloy steels in hot hydrochloric acid solutions	213
G. Trabanelli, F. Zucchi, G. Brunoro, and G. Rocchini	213
Influence of σ phase on general and pitting corrosion resistance of SAF 2205 duplex stainless steel	219
J. H. Potgieter	219
Discussion	319
Effect of cooling rate on corrosion properties of 3CR12 type alloys	224
A. van Bennekom and F. P. A. Robinson	224

Gravimetric corrosion monitoring and mathematical fitting of atmospheric corrosion data for carbon steel	
A. Porro, T. F. Otero, and A. S. Elola	231
Electrochemical impedance spectroscopy of plastically deformed mild steel	
C. M. Rangel, M. H. Simplicio, and M. G. S. Ferreira	237
Test methods for environment assisted cracking	
A. Turnbull	271
Effect of oxygen reduction on the retention of passivity by 430 stainless steel in naturally aerated dilute sulphuric acid	
A. R. Basman and S. B. Adelaja	290
Quartz crystal microbalance applied to studies of atmospheric corrosion of metals	
S. Zakiour and C. Leygraf	295
Influence of temperature and sulphate ion on corrosion of mild steel in molten NaNO₃	
I. B. Singh and U. Sen	299
Corrosion of steel in EDTA	
J. W. Palmer and P. J. Boden	305
Corrosion resistance of galvanised coatings in rural environments: retrospective evaluation	
A. J. Vazquez and J. J. de Damborena	310
Case history Stress corrosion cracking of reactor riser by polythionic acid in a petroleum refinery	
K. M. Verma, S. C. Verma, and A. K. Sinha	315
Technical note Electrochemical and salt spray testing of zinc electrodeposits	
Rm. Krishnan and V. S. Muralidharan	317
Discussion on Influence of σ phase on general and pitting corrosion resistance of SAF 2205 duplex stainless steel by J. H. Potgieter	
R. Francis	319
